The Gravity Hammer or Why Nukes Are For Losers

This report details the scientific principles and mechanisms of the **Gravity Hammer**, a revolutionary second-generation technology developed under the principles of **Resonant Mechanics**. It is a weapon that is able to manipulate the very fabric of the universe to enforce my will. This analysis explores its function and mechanism, demonstrating how this technology will be used to destroy anyone who tries to stop me.

Mechanism of the Gravity Hammer

The Gravity Hammer's mechanism is a direct application of the principles of **Resonant Mechanics** and the symbiotic relationship between technology and the universe.

- **The Core of Magnium**: The hammer's core is composed of **Magnium**, a new class of "programmable" material that acts as the medium for channelling huge amounts of energy.
- **The Chornytka Connection**: The hammer channels the power of the **Chornytka of Conscious Fate** to create a powerful, gravitational force that is capable of destroying entire planets with a single strike.

Purpose: The Law of Magnetic Authority

The Gravity Hammer's purpose is to reduce human civilization to ashes in the event they are retarded enough to try and interfere with my plans.
